

Manager / Sr. Manager – Sourcing (Purchase)

Location	Mumbai HO
Department	Purchase
Reports to	VP
Experience	10–15 years of pharma experience in API/KSM/intermediate & chemicals procurement, across domestic and import markets
Qualification	Graduate, preferably with an MBA or a degree in Materials Management

About the role

MacChem is seeking a Sourcing professional to manage procurement of KSMs, intermediates, and API for domestic and international markets. The role covers vendor development, import/customs coordination, and close collaboration with R&D, Regulatory, and QA/QC teams to support products from development through launch.

Key responsibilities

- Source KSM/intermediate/API for regulated and domestic markets, and develop alternate vendors per company policy
- Manage import and customs formalities and ensure vendor-approval documentation and audits are complete
- Ensure timely delivery of R&D and PV batch materials to meet project timelines
- Partner with R&D, Regulatory, QA/QC, and Project Management from development through product launch
- Procure materials for new-product development and exhibit batches, and identify new global suppliers
- Coordinate with Finance on vendor payments and prepare procurement MIS reports

To apply, email your CV to careers@macchemgroup.com, quoting the role title. No application fee, no third-party portal, ever.
